

TECHNICAL DATA SHEET

Nanoproof Nano-3 Sealer

Penetrating Sealer for Cement Surfaces – Sheen Finish

DESCRIPTION

COMPOSITION Impregnating agent for stone/cement surfaces

Free of perfluorooctanoic acid (PFOA*) and perfluorooctane sulfonic acid (PFOS*)

USES Water and oil-repellent agent with colour enhancing effect for manufacturing aqueous impregnations or stain-repellents designed for the use on natural or artificial stone areas

PROPERTIES - colour-enhancing surface protector - Water-repellent

- Oil and dirt-repellent
- Consolidating
- Creates visible beading effect
- Highly penetrating
- Suitable for all absorbent natural or artificial stones such as marble, travertine, Solnhofen slabs, sandstone, concrete blocks, terrazzo, granite, cotto coverings
- Excellent adhesion to the substrate

APPLICATION :

Depending on the absorption of the substrate, **NANOPROOF NANO-3** is a ready-to-use, single application sealer. Apply a uniform and rich coat of the dilution to the absorbent surface with a brush, roller or cleaning mop. A second coat may be applied after 24 hours for highly absorbent surfaces

NOTE :

OVERAPPLICATION CAN CAUSE A SHADE CHANGE. It is advisable to carry out tests prior to application.
